

Quality policy statement

Verolme® Special Equipment is a world leader in manufacturing high-end process equipment. Our core expertise is building state-of-the-art heat exchangers, pressure vessels and reactors at the high temperature, high pressure, and high corrosion resistance area.

VSE designs manufacture and deliver for a wide variety of industries, like the oil & gas, petrochemical, chemical, polysilicon and marine industries worldwide in more than 30 countries.

Quality is of great importance to VSE. We have an established Quality Management System that sets the standard within the company and is integrated into all our business activities.

We are committed to:

- Establish and maintain a safe and stimulating work environment
- Exceed industry standards and customer expectations
- Remain our strong reputation
- Achieve mutual profitability
- Establish a long-term relationship with our clients and suppliers
- Continuous improvement of our Quality Management System

We accomplish this through:

- Market-driven product and process innovation
- Risk management and open dialogues with our clients and suppliers
- Compliance with the ISO9001 standard and other relevant certificates
- Keeping employees involved with the Quality Management System
- Excellent leadership and career opportunities
- Sharing expertise and information and working together
- Setting measurable quality objectives

This quality policy statement is communicated and available at all times through the website, staff handbook. Implementation is safeguarded and monitored through toolbox meetings, QMS meetings, and management team meetings.

Juul IJzermans
