

## Quality policy statement

Verolme® Special Equipment is a world leader in manufacturing high-end process equipment. Our core expertise is building state-of-the-art heat exchangers, pressure vessels and reactors at the high temperature, high pressure, and high corrosion resistance area.

VSE designs, manufactures and delivers for a wide variety of industries. Businesses include the oil & gas, upstream oil & gas, petrochemical, chemical, polysilicon and marine industries worldwide in more than 30 countries. VSE also provides inter-company services for our sister companies Logan Industries and Exotech.

Quality is of great importance to VSE. We have established a Quality Management System that sets the standard within the company and is integrated into all our business activities.

We are committed to:

- Establish and maintain a safe and stimulating work environment
- Exceed industry standards and customer expectations
- Maintain our strong reputation
- Achieve mutual profitability
- Establish a long-term relationship with our clients and suppliers
- Continuous improvement of our Quality Management System.

We accomplish this through:

- Market-driven product and process innovation
- Risk management and open dialogue with our clients and suppliers
- Compliance with the ISO9001 standard and other relevant requirements
- Keeping employees involved in the Quality Management System
- Excellent leadership and career opportunities
- Sharing expertise and information and working together
- Setting measurable quality objectives.

This quality policy statement is communicated and available at all times through the website and the staff handbook. Implementation is safeguarded and monitored through toolbox meetings, QMS meetings, and management team meetings.
